DETAILED ACTION

Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
 - I. Claims 1-19, drawn specifically to a camera zooming control apparatus with input means and calculation means, classified in class 348, subclass 240.2.
 - II. Claims 20-29, drawn broadly to a camera zooming control apparatus as part of a video distribution server, classified in class 348, subclass 211.3.
2. Inventions I and II are distinct and related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations. MPEP § 806.05(c).

In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed. The subcombination has separate utility, such as in camera control hardware that is not part of a client-server environment.
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
